

Scale Faster. See Clearer. Carry Less.

Every serious operator eventually makes the same quiet decision: stop running the business by hand. SK ShiftControl deploys advanced AI agents — systems with memory, tools, and judgment — that lift the manual load off your team and anchor your operation to one crystal-clear source of truth.

THE MANUAL FLOOR

You Can't See It on the P&L. You Feel It Everywhere Else.

- **The Blur.** Sales in the CRM, orders in spreadsheets, invoices buried in email — decisions stall while the data argues with itself.
- **The Static.** Every channel shouting at once. Your sharpest people spend their best hours triaging noise.
- **The Drag.** Re-keyed data. Follow-ups that depend on memory. Month-end assembled by hand — and the load grows with you.

None of this is a people problem.
It's an architecture problem.

VS

SK SHIFTCONTROL

Your operation, running itself. Deployed, not promised.

- **AI phone agent** — every call answered, booked, and logged, 24/7.
- **CRM & appointment setting** — the pipeline moves itself; nothing waits on memory.
- **Website building & lead generation** — the front door feeds the system.
- **One synced stack** — your platforms reconciled through a single n8n pipeline.
- **Zero-Data Retention** — processed in memory, never stored, never used for training.

The First Move — The Systems Audit

30 minutes. We map where your operation leaks time and revenue. The map is yours to keep — either way.

6 Industries deployed — trades & roofing, law firms, clinics & dental, venues & retail, real estate, e-commerce.

24/7 Coverage. The agents answer at 2 AM with the same patience as 2 PM — no voicemail, no lost lead.

1 Point of contact. A direct line to the operator who builds and runs your system — not a ticket queue.
